

**KTA-4**

Model

**KLIPPER GUN**

Bulletin No.

**11**

Date of Change

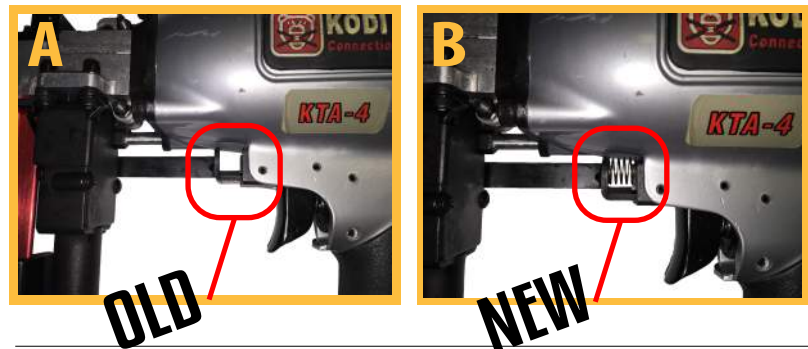

**AUGUST 2015**

We have streamlined our Klipper Gun by redesigning one side of the Nozzle Assembly. Parts have been eliminated and the Safety Actuator Spring has been moved.

## PARTS ELIMINATED

The *new* Nozzle eliminates the need for the following parts:

| PART #   | ITEM         | QTY |
|----------|--------------|-----|
| 70-14422 | Safety Cover | 1   |
| 70-1B140 | Spring Pin   | 1   |
| 70-A6607 | Bolt         | 1   |
| 70-B6603 | Bolt         | 1   |
| 70-10428 | Spring       | 1   |

Included with this Service Bulletin is an updated parts breakdown and one (1) Safety Spring [PN: 70-10127]. Here is the Field Fix:

1. Install the new Nozzle [PN: 70-34421] as you would the old Nozzle [PN: 70-24421], note that you will no longer need the parts listed in the PARTS ELIMINATED box above.
2. Place the included Safety Spring [PN: 70-10127] between the flat side of the Safety Unit [PN: 70-14408] and the Safety Guide [PN: 70-10407]. [See Figures A & B]
